The screenshot shows a case study article from the FIDO Alliance. The title is "Mercari's passkey authentication speeds up sign-in 3.9 times". The article discusses how Mercari, a Japanese e-commerce company, improved its security and user experience by implementing passkeys instead of passwords and SMS OTPs. It highlights that passkeys are faster and more secure, reducing the risk of phishing attacks. A table compares the success rates and authentication times for SMS OTP and Passkey. The article concludes that the higher success rate and shorter authentication time of passkeys led to a better user experience for Mercari's 900,000 accounts.

Mercari's passkey authentication speeds up sign-in 3.9 times

Mercari, Inc. is a Japanese e-commerce company, offering marketplace services as well as online and mobile payment solutions. With Mercari users can sell items on the marketplace, and make purchases in physical stores. In 2023, they implemented passkeys. This article will explain the motivation behind their decision and the results they achieved.

Motivation
Previously Mercari was using passwords and faced with real-time phishing attacks, added SMS OTPs as an authentication method to protect their users. While this improved their security, it did not completely eliminate real-time phishing attacks. Sending a high volume of SMS OTPs was also both expensive and not very user-friendly.

Mercari also had a new service Mercari, a platform for buying and selling Bitcoin with the user's available balance in Mercari, which had strong security requirements and [passkeys](#) met their needs.

Because passkeys are bound to a website or app's identity, they're safe from phishing attacks. The browser and operating system ensure that a passkey can only be used with the website or app that created them. This frees users from being responsible for signing in to the genuine website or app.

Requiring users to use extra authentication methods and perform additional action is an obstacle when what users actually want is to accomplish something else using the app.

Adding passkey authentication removes that additional step of SMS OTP and improves user experience while also providing better protection for users from real-time phishing attacks and reducing the cost associated with SMS OTPs.

Results
900,000 Mercari accounts have registered passkeys and the success rate of signing in with them is 82.5% compared to 67.7% success rate for signing in with SMS OTP.

Signing in with passkeys has also proved to be 3.9 times faster than signing in with SMS OTP—Mercari users on average take 4.4 seconds to sign in with passkeys, while it takes them 17 seconds to do the same with SMS OTP.

	Success rate	Authentication time
SMS OTP	67.7%	17 s
Passkey	82.5%	4.4 s

The higher the success rate of authentication and the shorter the authentication time, the better the user experience and Mercari has seen great success with implementing passkeys.

Sponsored Webinars

Sponsored Webinar Overview

The FIDO Alliance hosts free public webinars throughout the year, drawing between 300-500 registrants per webinar. These events are one of our most successful avenues for driving awareness around passkeys and other initiatives.

The FIDO Alliance is offering members the opportunity to co-sponsor one webinar per year, enabling the same reach and thought leadership opportunities to the sponsor.

As a webinar sponsor, your company will have the opportunity to work with FIDO Alliance to craft an impactful session, own the resulting recording, and leverage FIDO's creative and marketing teams to achieve high awareness and registration.

What's Included:

All strategy, planning, promotion of co-sponsored webinar with FIDO Alliance:

- Content development and strategic guidance
- FIDO Alliance spokesperson/SME as presenter – along with yours
- All registration contacts
- Q&A, polls and other engagement reporting
- Promotion through all FIDO channels to drive registration
- Own the webinar video after airing for your promotional purposes with direct links from FIDO Alliance website OR have the video added to the FIDO Alliance library of content

What Sponsors Are Saying

RESULTS: SPONSOR 1

- Booked 6 meetings which led to 4 currently open sales opportunities
- 2 open sales opportunities re-engaged as a result of the webinar
- Created open channel to 300+ new contacts

This is the best list we've received so far in terms of titles, company size, and overall relevance. We're confident these initial stats are just the beginning—more deals are likely to emerge from this list.

RESULTS: SPONSOR 2

- 2 new, active sales opportunities directly resulting from the webinar
- 5 MQLs, 10 SQLs
- Webinar gated on sponsor's page continues to develop hot leads and is a valuable sales and marketing resource

It was definitely the best performing webinar we have done. We have had webinars with partners like ISMG that give you a lot of leads on paper but very few ever pan out.
